

Rausch Advisory Services LLC. Presents ACL Training for Internal Auditors.

Rausch was founded with a simple goal in mind - provide our clients strategic insight and skilled execution, while creating and maximizing shareholder value. We are doing this in the areas of Finance and Accounting, Internal Audit and Information Security. Specifically Rausch is offering our ACL Training for Internal Auditors class as a dedicated training session for our clients utilizing their data to help shorten the learning curve.

Focus and Features

Designed for intermediate-level users of ACL™, this two-day course introduces you to the use of ACL and Continuous Controls Monitoring. This is an interactive, hands-on environment, you will learn how to create tests for transaction authorization and validation and how to perform trend analysis on employee and merchant activity utilizing your organizations data versus using generic data that you might receive in remote training courses.

Course Objectives

By the end of this workshop, you will be able to:

- Understand the concepts of Continuous Controls Monitoring
- Perform data analysis tests to identify anomalies and policy non-compliances
- Perform trend analysis on the anomalies to identify cause and fraudulent activity
- Verify data quality and integrity
- Test transaction authorization and validation
- Create tests for purchasing and payables, travel and entertainment expenses, and procurement card expenses
- Describe the Benford's Law theory and use Benford tests in ACL

Who Should Attend

Financial, Operational, External Auditors, Information Systems Auditors, and Audit Management.

Program Level & Field of Study

This is an intermediate-level course. 16 hours of CPE can be earned in the Auditing field of study

Advanced Preparation & Prerequisites

There is no advance preparation needed for this course. However basic level of experience in ACL is strongly recommended or at least six months previous experience using ACL for data analysis. Participants should also have a background in Internal Audit.

Course Method

This is a group-live, instructor-led course in a classroom setting within your environment. For in-class activities, participants use the latest version of ACL. The class size supports individual attention and development. This option works best when there are four to ten people who require training. ACL On-site training requires a standard non-disclosure as part of our statement of work. For more information, please contact us.
